FINDING YOUR LIVESTREAM ON YOUTUBE

First go to YouTube, then click on Upload

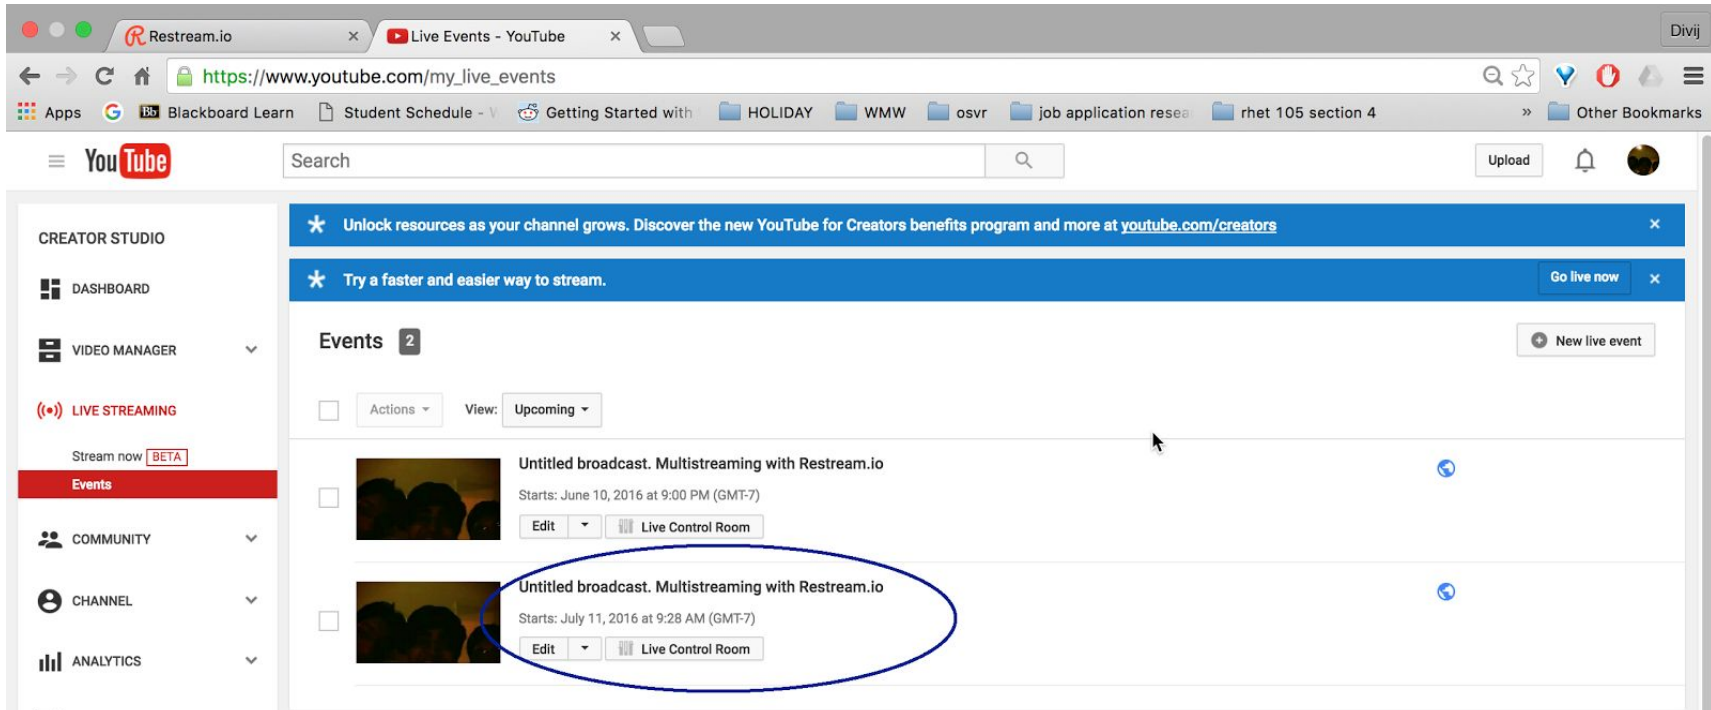

Then Click on Get started under Live Streaming

If you're streaming directly to YouTube, such as through YouTube Gaming, you should see your stream live under Stream Now.

The screenshot shows the YouTube Live Dashboard interface. At the top, there are browser tabs for 'Restream.io' and 'Live Dashboard - YouTube'. The address bar shows the URL 'https://www.youtube.com/live_dashboard'. The left sidebar contains the 'CREATOR STUDIO' menu with options: DASHBOARD, VIDEO MANAGER, LIVE STREAMING, Stream now (BETA), Events, COMMUNITY, CHANNEL, ANALYTICS, and CREATE. A blue arrow points to the 'Events' option. The main content area features a blue banner for 'Unlock resources as your channel grows...' and a 'Welcome back, Divij Nagpaul!' message with a 'BETA' badge. Below this, a video player shows 'This stream is OFFLINE'. To the right of the video is a 'CHAT' section. At the bottom, there are buttons for 'Create highlight' and 'Change thumbnail'.

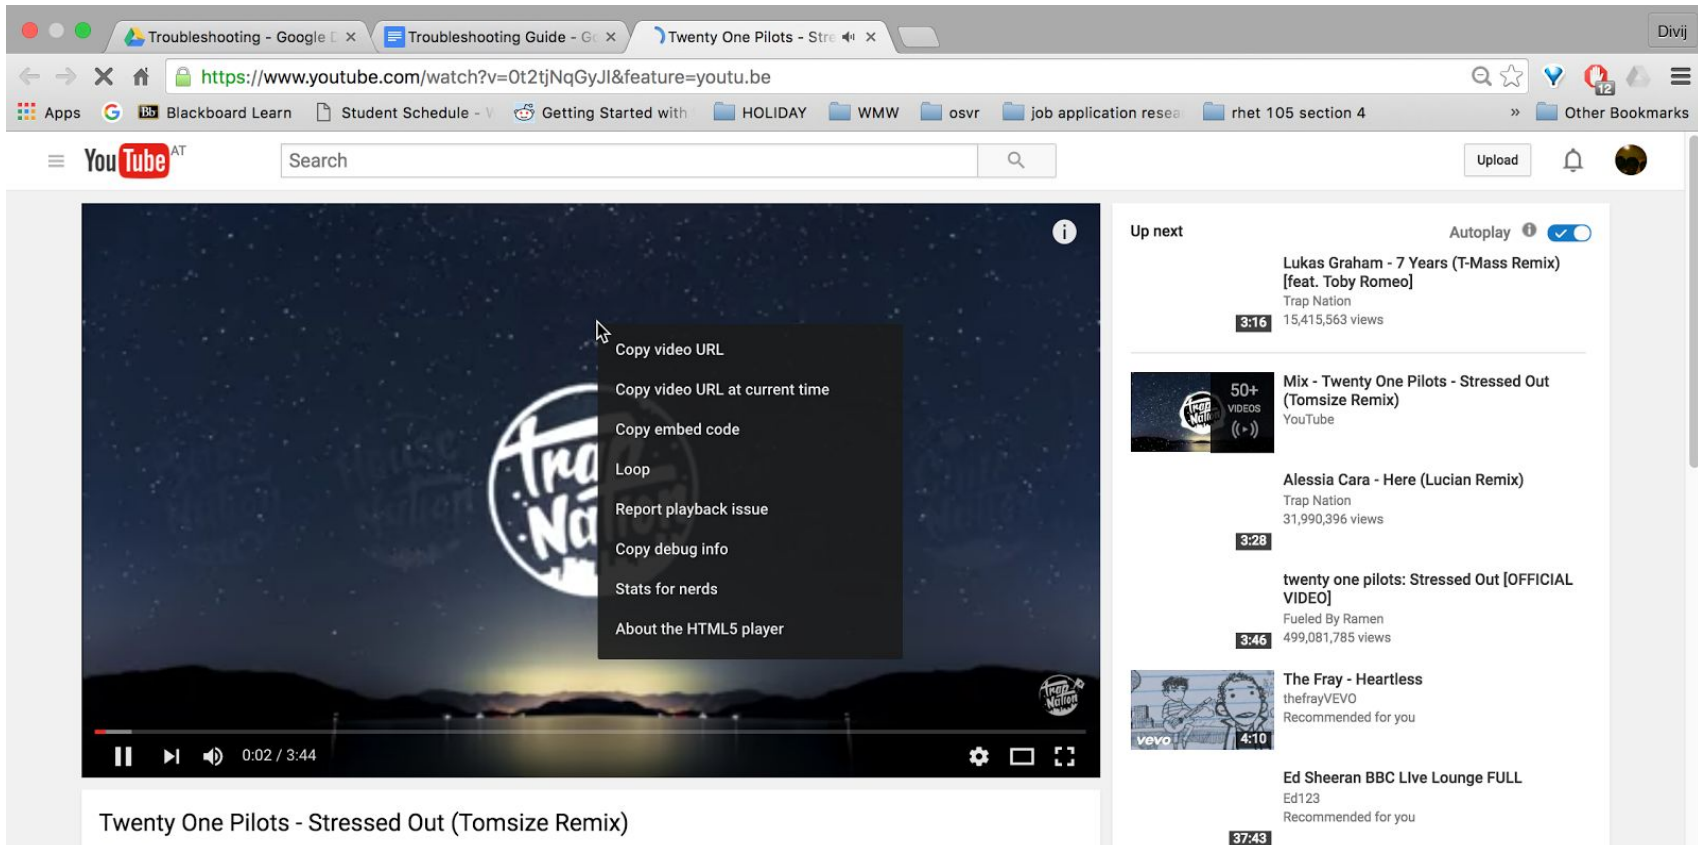

If you're streaming through Restream, you will either see your live stream on another tab within the Stream Now window or under the Events window.

Once you find your live stream, open it.

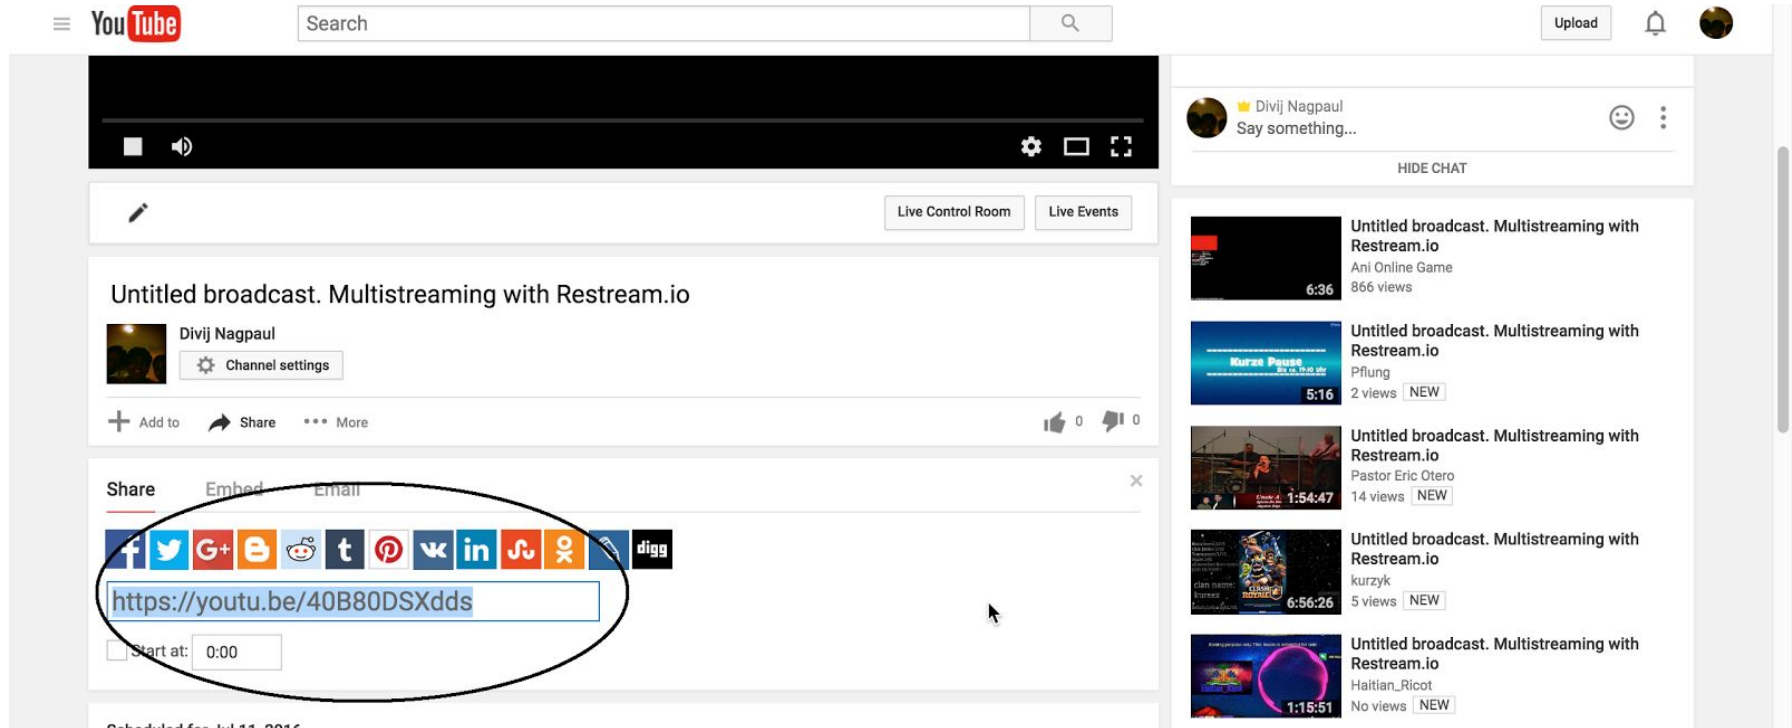

OBTAINING THE RIGHT YOUTUBE LINK

Now that you have your Live Stream on a new page or on your live dashboard, we can obtain your stream's YouTube link. It should look something like <https://youtu.be/0t2tjNqGyJI>, in theyoutu.be format. You can find this link if you right click somewhere within your live stream video player and click on Copy Video URL

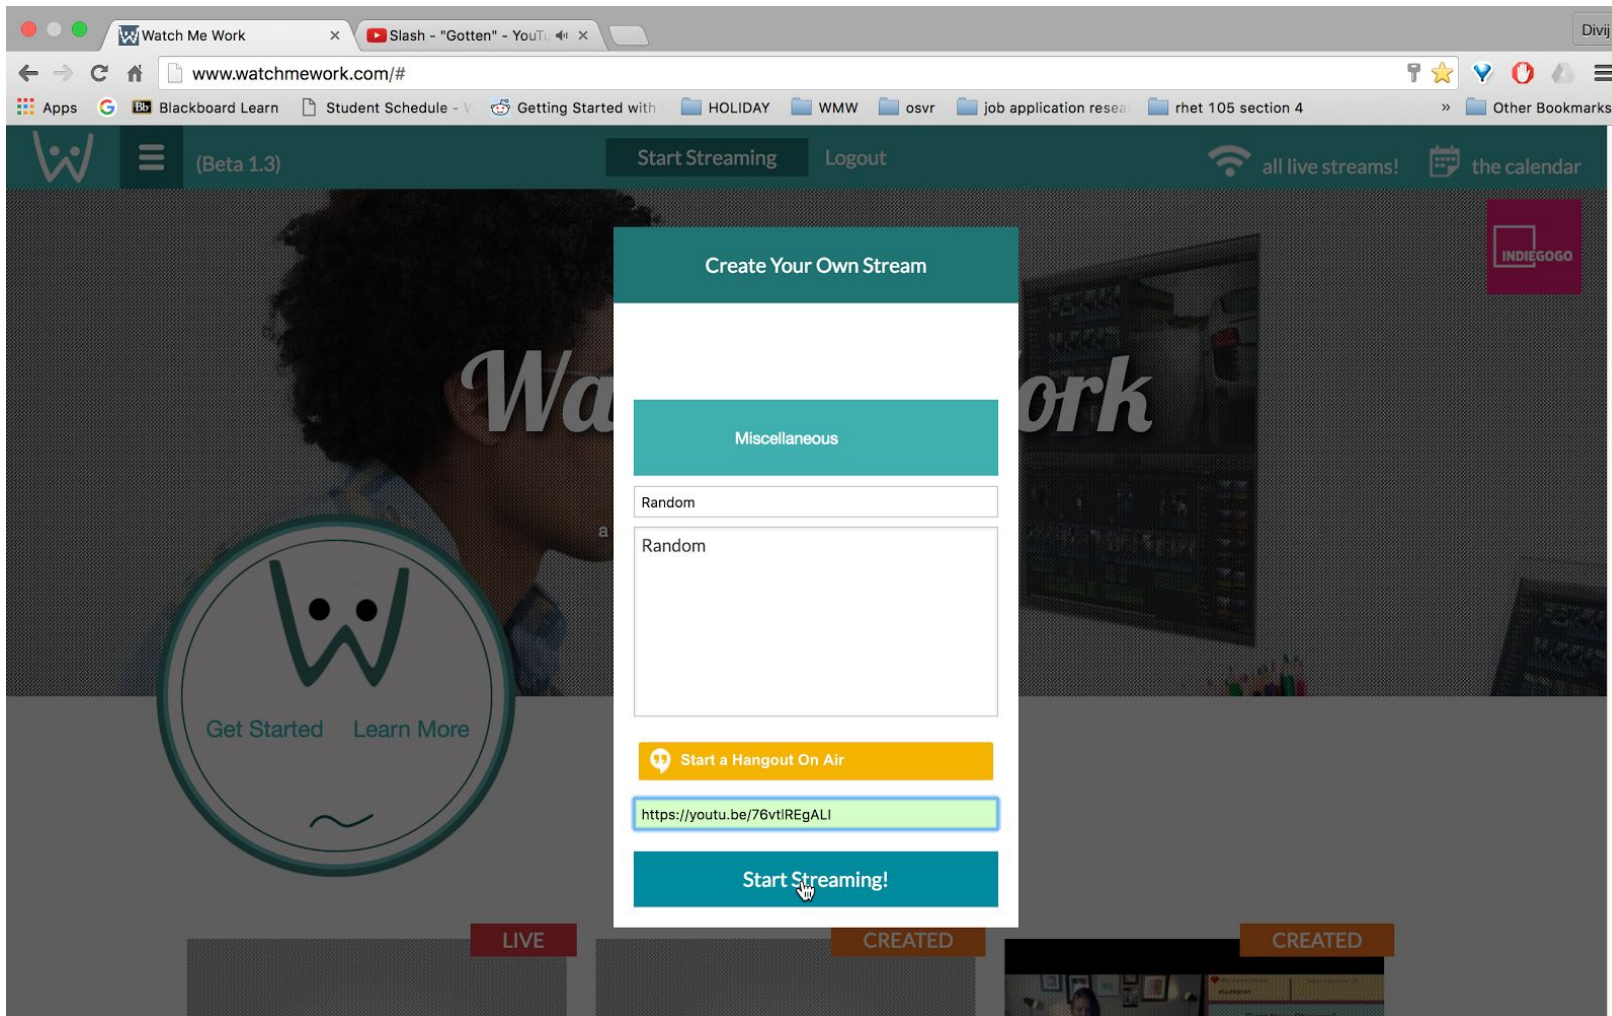

The screenshot shows a web browser window with three tabs: 'Troubleshooting - Google L...', 'Troubleshooting Guide - Gr...', and 'Twenty One Pilots - Stre...'. The address bar displays the URL <https://www.youtube.com/watch?v=0t2tjNqGyJI&feature=youtu.be>. The browser's bookmark bar includes 'Apps', 'Blackboard Learn', 'Student Schedule - V...', 'Getting Started with', 'HOLIDAY', 'WMW', 'osvr', 'job application rese...', and 'rhet 105 section 4'. The YouTube interface shows a video player for 'Twenty One Pilots - Stressed Out (Tomsizemix)'. A context menu is open over the video, listing options: 'Copy video URL', 'Copy video URL at current time', 'Copy embed code', 'Loop', 'Report playback issue', 'Copy debug info', 'Stats for nerds', and 'About the HTML5 player'. The 'Copy video URL' option is highlighted. To the right, the 'Up next' section lists several recommended videos, including 'Lukas Graham - 7 Years (T-Mass Remix) [feat. Toby Romeo]', 'Mix - Twenty One Pilots - Stressed Out (Tomsizemix)', 'Alessia Cara - Here (Lucian Remix)', 'twenty one pilots: Stressed Out [OFFICIAL VIDEO]', 'The Fray - Heartless', and 'Ed Sheeran BBC Live Lounge FULL'.

You can also find this URL under the share button. Do note that this sometimes doesn't work as the link is not in the correct format.

Now paste this URL in the WatchMeWork Start Streaming Form

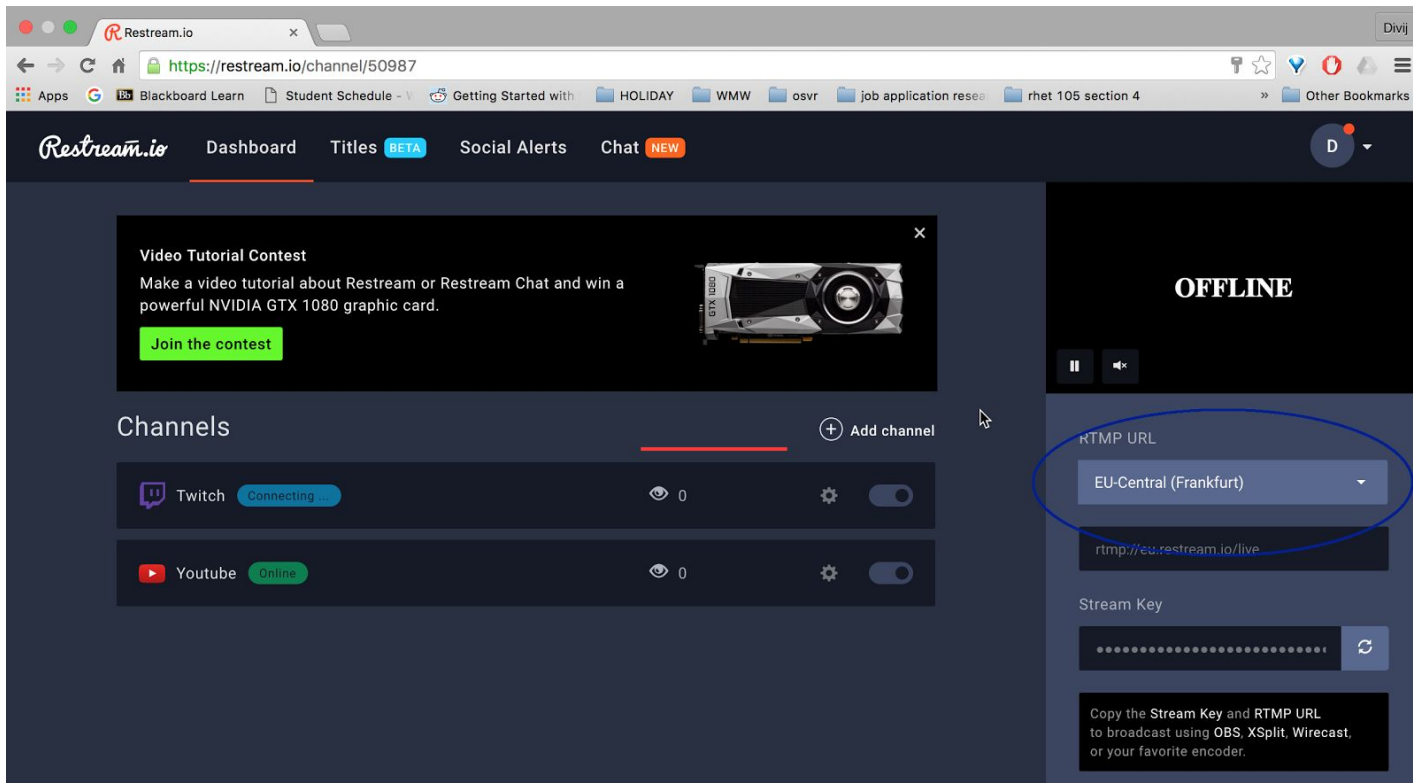

And Start Streaming!!!! Do note that if the form receives a wrong link initially, it may continue to generate an error even after you've added the right one. Therefore, you may have to log out of the site and clear your history/cache in your browser in order for it to accept the correct link and start the stream on WatchMeWork.

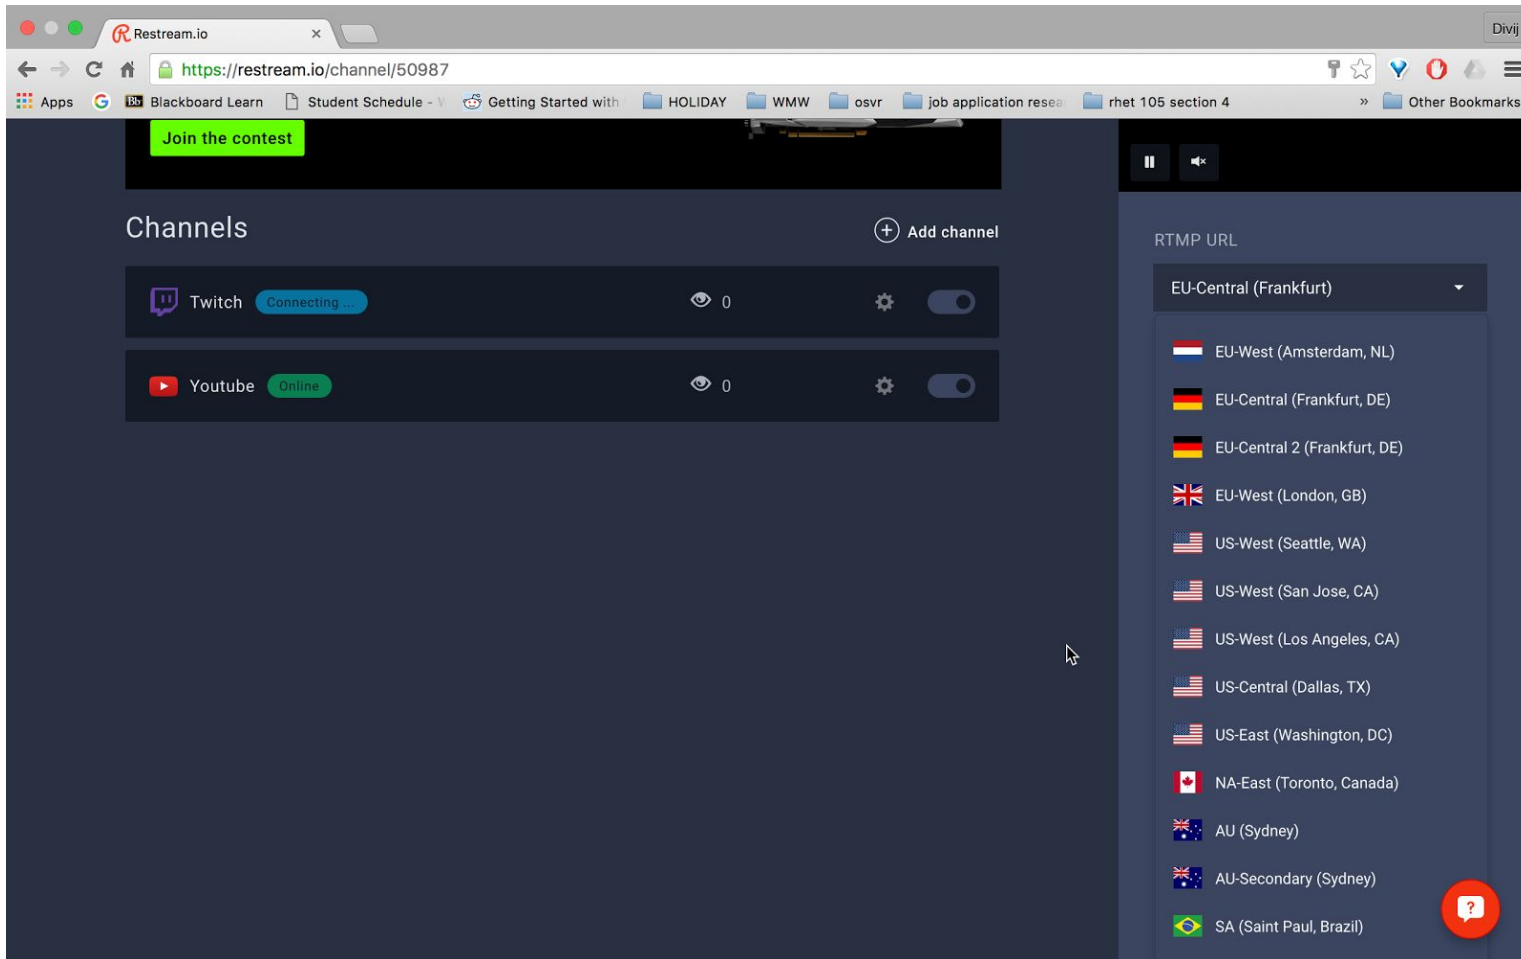

PROBLEMS USING RESTREAM

Sometimes there is a large delay in your live stream, or your stream just refuses to start. This happens if the streamer hasn't selected the closest server to them.

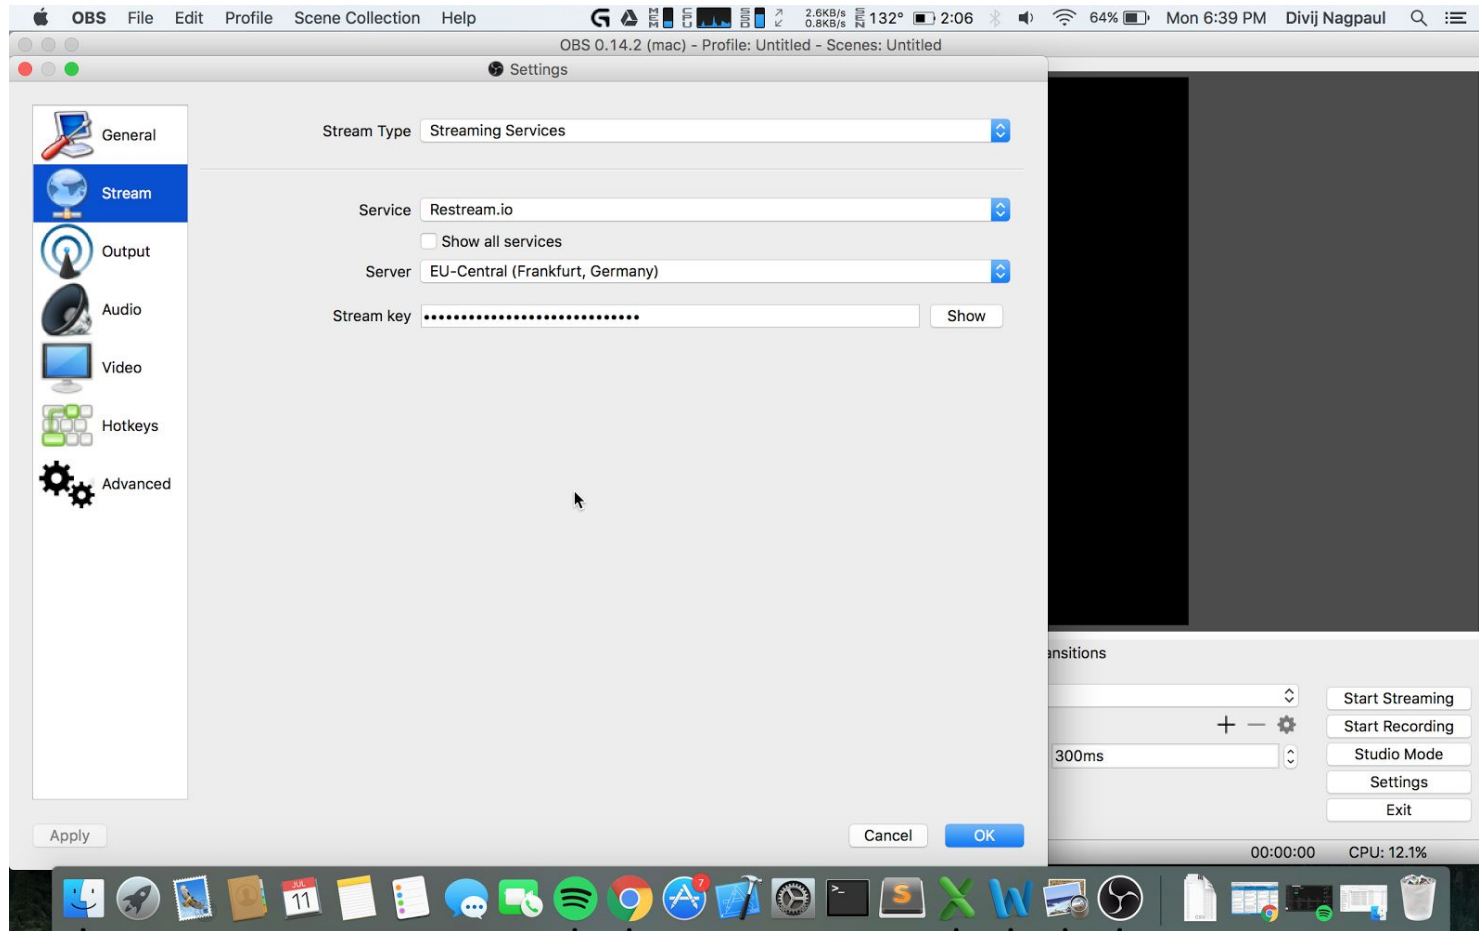

To change this setting, go to restream.io and login. After that, click on the dropdown menu underneath RTMP URL

Then select the closest server to you. For example, if you are in the Midwest, choose the Central Server and not the East Coast/West Coast server. Also, users who are trying to stream from places other than those listed under server locations should try switching between servers to find the one best suited for them.

Do ensure that you change the server settings within your Encoder software (OBS) too

If your stream still refuses to start on either Twitch or YouTube, restart your encoder software (e.g. OBS) and then try starting the stream again. If the stream that refuses to start is YouTube, try changing the channel type from "YouTube Stream Now" to "YouTube Events" or vice-versa.

GENERAL STREAM PROBLEMS

If users are facing problems with Microsoft Edge/Explorer, use Chrome or Firefox instead (our recommended browsers).

Please ensure that you fill all parts of the "Start Streaming" form including "Select An Application" before you click on "Start Streaming!". If the stream still refuses to start, logout, open <http://www.watchmework.com/> in a new tab/window, re-login and then try starting the stream again. This should solve the issue. However if the problem persists, try restarting your web browser or even using a different web browser to start the stream.

For Hangouts on Air, users should refer to the document, "How to Start a Stream".
